## SiTest Solutions Ltd. Now Offers Verigy

### V93000 SOC Test Services in China

**HONG KONG, November 08, 2007** -- SiTest Solutions Ltd. today announces that they are now providing semiconductor test application support in China and Hong Kong on the Verigy V93000 SOC Series test platform. SiTest Solutions is a Hong Kong headquartered test engineering and services company, and provides test development and production test solutions for those companies targeting high-volume testing in China / Asia. Test services include V93000 test program development, test through-put analysis and enhancements, and transfer of test applications into mass-volume production test facilities in China. SiTest Solutions provides the technical link between customers and the China/Asia-based production factories – providing technology transfer, post-production support, and resolution of problems with fast feedback & quality communication to the customers.

"Our extensive test engineering and development experience will allow us to deliver the best test strategies for state-of-the-art technology devices to be tested on the V93000 test platform", stated John Ritchie Managing Director of SiTest Solutions. "In addition to providing the technology expertise, SiTest Solutions has a direct technical conduit into all regions of China. Our test engineering teams are fluent in English, Mandarin, and Cantonese, enabling us to provide timely and direct feedback to our customers."

Yih-Neng Lee, Vice President & General Manager, Asia Sales, Marketing and Support, Verigy, stated "We are pleased to welcome SiTest Solutions to Verigy's respected list of test partners. We look to SiTest Solutions to provide V93000 test strategies to our mutual customers requiring test services for their products in China."

SiTest Solutions Ltd. is a provider of semiconductor test services and production test strategies. For more information, please visit our website at [www.SiTestSolutions.com](http://www.SiTestSolutions.com).
