Silicon Test Solutions, Services, & Strategies

Press Release

FOR IMMEDIATE RELEASE

Austin Semiconductor Inc. Selects SiTest Solutions Ltd. as Primary Test Provider

HONG KONG, September 17 2007 -- SiTest Solutions Ltd. today announces that they have been chosen as the primary provider of advanced testing services for Austin Semiconductor Inc. of Austin, Texas. SiTest Solutions is a Hong Kong headquartered test engineering and services company, and will be the central pre-production and production test solutions provider for Austin Semiconductor's latest integrated products. These products include several SSiP (Sub-System in Package) and SiP (System in Package) device definitions, including NAND-SLC based Solid State Disk on Chip (SSDoC), next generation integrated memory modules, core computer systems on chip, and future RF and mixed signal modules.

"Our extensive test engineering expertise at the component, board, and sub-system levels, allows us to deliver the best test strategies for state-of-the-art mixed technology SIP devices", stated John Ritchie Managing Director of SiTest Solutions. "In addition to providing the technology expertise necessary to verify and qualify Austin Semiconductor's devices, being centrally located in Asia allows fast access and response to both suppliers and customers."

Frank Muscolino, President of Austin Semiconductor, stated "We will be looking to our new test partner, SiTest Solutions, to provide strategies to test our uniquely integrated products with the lowest cost-of-test". Dave Harrison, VP of Sales & Marketing at Austin Semiconductor added, "The challenge with our latest device definitions is being able to effectively and efficiently test the different technologies we integrate within a single package. This requires a unique test methodology and capability not readily found at test service companies. SiTest Solutions has this capability and expertise, which provides Austin Semiconductor and its customers the test coverage required, providing all parties high quality, reliable, cost effective solutions".

SiTest Solutions Ltd. is a provider of test services, and production test strategies. The company supports test program development, new device design verification and electrical characterization, as well as transfer and support of high volume production testing. For more information about the company, visit our website at www.SiTestSolutions.com.

Austin Semiconductor, Inc. (ASI) is a fully QML certified, ISO registered company that supports the high reliability product solution requirements of industries including Military, Aerospace, Transportation, Industrial/Embedded as well as Medical Diagnostics/Imaging. ASI offers I/C components, multi-chip modules and integrated product solutions and modules to their customers. ASI designs, develops and manufactures these products exclusively for the global marketplace.
